# AECO Cruise Database & Live Scheduler

On 1 January 2025 the AECO Cruise Database and Live Scheduler was officially launched. The new system opens a new era of accurate information sharing and gathering.

The AECO Cruise Database and Live Scheduler is mandatory to use for all AECO operating members.

This manual is primarily intended for ship based users such as those registered as *EL* and *Bridge Officer/DPA* roles.

The AECO Cruise Database and Live Scheduler can be accessed here:

**[www.database.aeco.no](http://www.database.aeco.no)**

The system is separate from other AECO tools where log on is required!

# 1. Access levels

The New AECO Cruise Database and Live Scheduler gives more oversight and responsibility to the members than ever before. It also provides a platform that enables overview of operations and easy access to complete several AECO obligations.

Therefore, the new Cruise Database and Live Scheduler has increased cyber security aspects embedded, which includes different access levels in which company operatives are registered.

## 1.1 User access roles

### *Admin*

The person responsible for the Cruise Database & Live Scheduler (CDB) of the operating member in question. More than one *Admin* can be registered as contingency. It is the responsibility of the *Admin* to initially create users to access the CDB on behalf of the company that he/she represents.

- The *Admin* is required to use two-factor authentication (2FA) when logging on.
- The *Admin* will automatically be notified with all *TASKS* pending.
- The *Admin* has access to an Audit Log to monitor all traffic on the profile of the member in question.

### *Operator*

Intended for operations managers and similar positions within a member company. The *Operator* has access to almost as much as the *Admin* allowing work to be delegated to the *Operator* role. More than one *Operator* can be registered.

- The *Operator* role will automatically be notified all *TASKS* pending.
- The *Operator* can create users with roles of *Operator*, *Expedition leader*, and *Bridge officer*.

### *Expedition leader*

The *EL* role is not intended to be a personal registration. Instead use a ship based expedition leader e-mail address that allows changing expedition leaders to use the same log on credentials.

- The *Expedition leader* will be automatically notified if PVRs are missing via the TASK tab.

### *Bridge Office/DPA*

The *Bridge officer/DPA* role is not intended to be a personal registration for vessels. Instead use a ship based bridge e-mail address that allows changing bridge officers to use the same log on credentials.

If a Designated Person Ashore (DPA) is registered, please use individual e-mail to register.

- This role allows *Admin* or *Operator* to delegate, i.e., vessel information to be added and confirmed directly from the ship.
- The *Bridge officer/DPA* role will be automatically notified if ship specific information is incomplete or has not been updated on an annual basis via the TASK tab.

Your log on session (without the need to log in again) will be concluded:

- After 7 days,
- You log out,
- You clear the browser data.

## 1.2 Checklist:

The *EL* role must be informed about the ships' specific PIN code. This is necessary for generating trips, editing trips.

- Request the ships specific PIN code from the company *Admin* or *Operator*.
- As a safety procedure the ships PIN will change every year.
- Using the ships specific PIN once it is then valid for as long as the session lasts. See below.

## 2. User Interface

The Cruise Database and Live Scheduler has two top menus featuring different aspects of the database.

The top menu consists primarily of items that field operations use in day to day work:

The *Database* menu consists of items that primarily is used by office personnel or the *Bridge officer/DPA* role.

Not all menu items are visible or can be edited by all user levels.

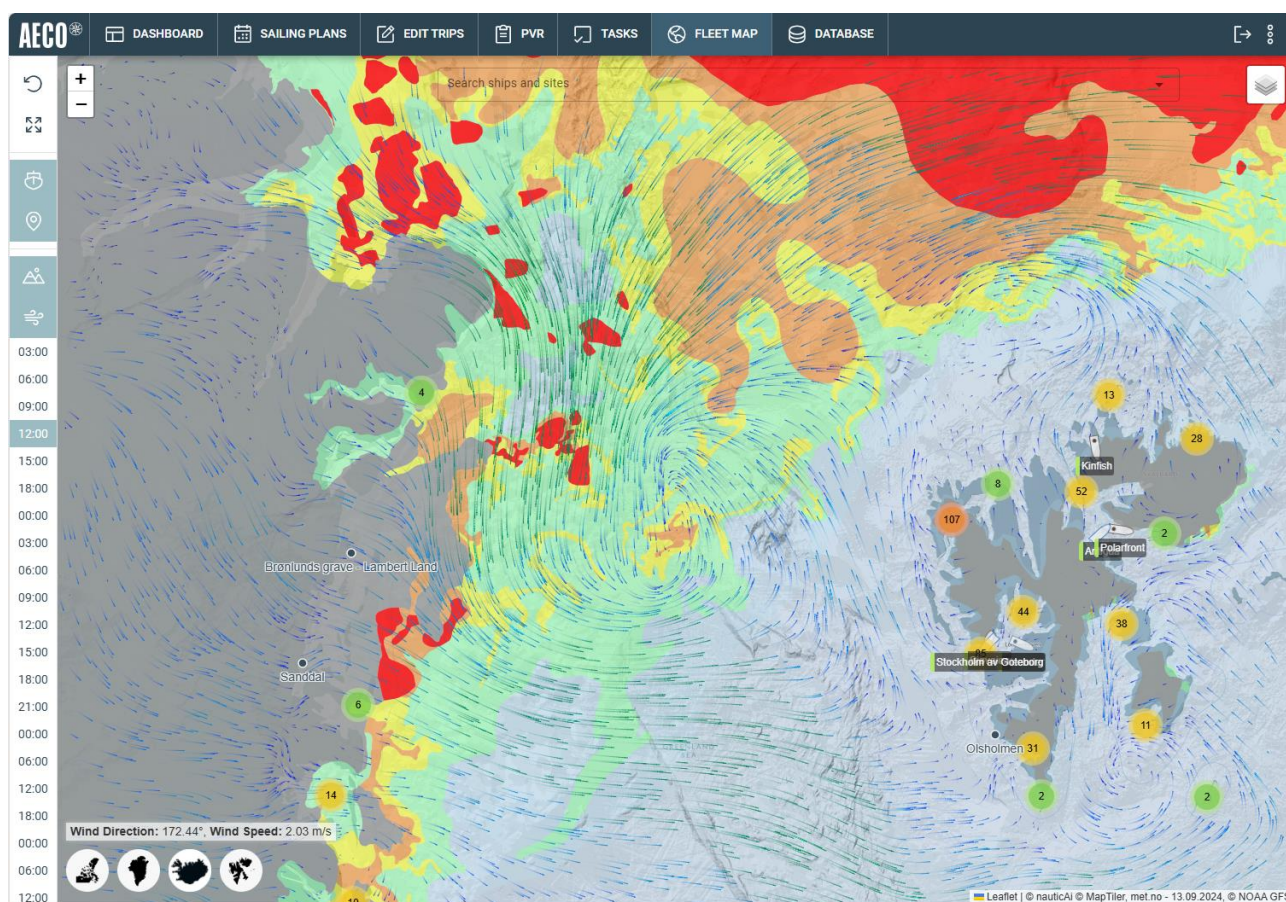

## 3. Fleet Map

### 3.1 Fleet Map Layers

#### *Ice and wind*

The **Fleet Map** menu offers a live overview of all vessels registered as active in the database. Click the left side menu and overlay registered sites and/or wind forecasts, and/or ice chart to the map.

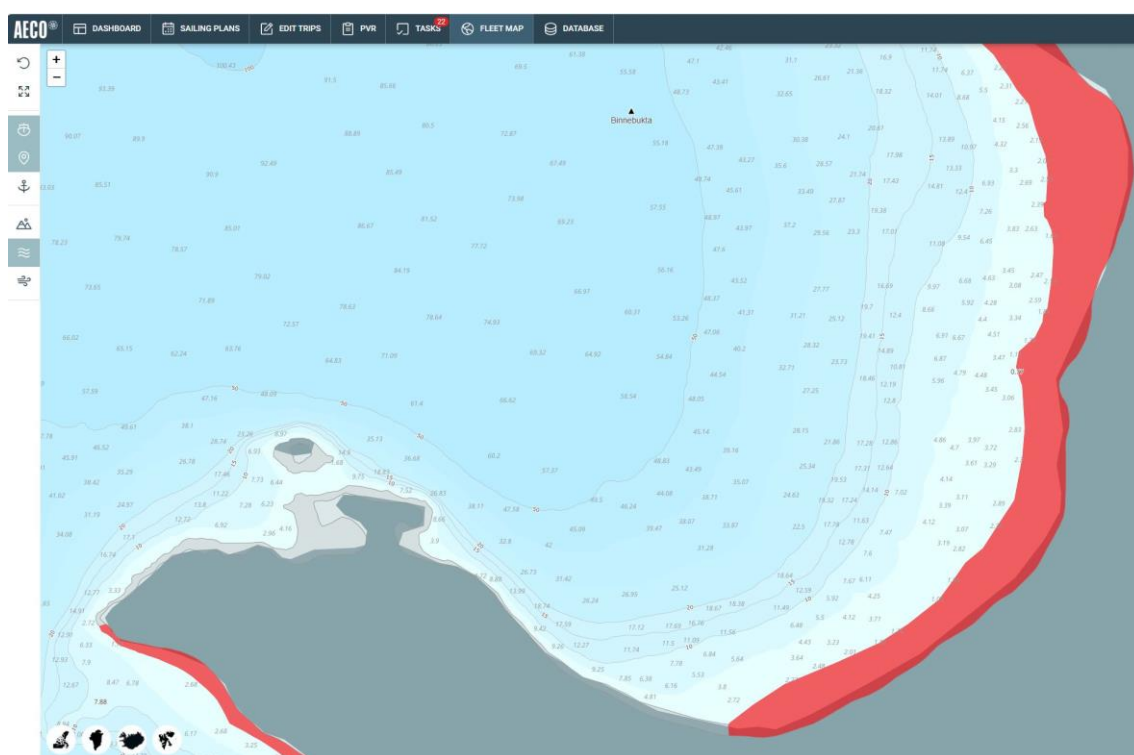

## *Soundings Svalbard*

In addition, it is possible to zoom in to see soundings from Svalbard (only). The soundings are officially recorded and is accessed via the Norwegian Mapping Authority. These data include soundings that are not yet available on official nautical charts.

The red area indicates no soundings available. For other areas zoom in (keep zooming in) to get fine details.

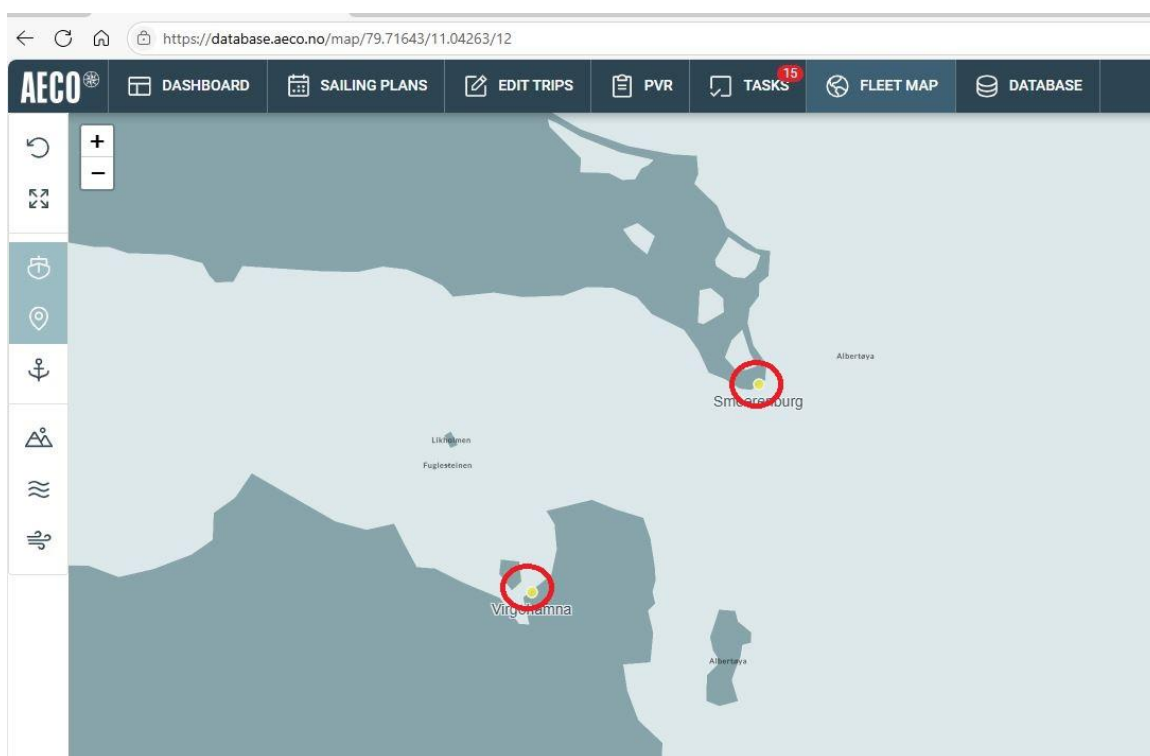

NB! This feature is not for navigation!

## Sites

The *Site* layer has multiple features installed to assist getting an overview of the booking situation for a given site two days into the future.

Site markers on the map are per default black. However, the *Site* layer offers an easy overview if a site is booked during the day. If this is the case the site marker is yellow. If a site marker is black *Sites* on the overlay it means that no vessels are booked during the next two days.

A yellow site marker only indicates that bookings have been made on the day. Not which time slots have been booked. For further information on what time slots have been booked and by which ship, click the yellow site marker.

The window also shows any restrictions that may apply to the site.

The screenshot displays the AECO database interface. A map of the Arctic region is shown, with a yellow site marker indicating a booking. A pop-up window titled "Smeerenburg" provides detailed information about the site. The window is divided into several sections: Properties, Restrictions, Guidelines, and Upcoming visits.

**Smeerenburg**

**Properties**

- Latitude: 79.7317123413086
- Longitude: 11.002120018005371
- No Global Port linked
- Concurrent ship visit are not possible
- Per day ship visits are not limited

**Restrictions**

- Landing activities only within marked border. (Valid: 1 January - 31 December) 2 months ago

**Guidelines**

- Site - Smeerenburg (Description: Smeerenburgsite guidelines)
- Cultural remains - AECO Arctic Cultural Remains Guidelines
- Wildlife - Walrus Guidelines (Description: AECO Walrus Guidelines 2025)

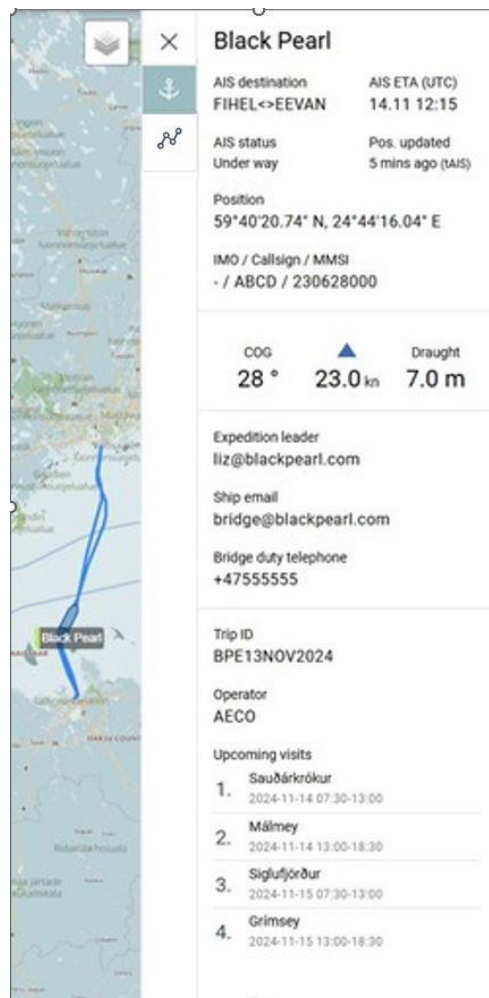

**Upcoming visits**

- 2025-05-23 07:30-13:00 Stockholm
- 2025-05-23 13:00-18:30 Ultramarine
- 2025-05-24 13:00-18:30 Spitsbergen
- 2025-05-25 07:30-13:00 Polaris I
- 2025-05-25 13:00-18:30 Quest
- 2025-05-25 18:30-22:00 Freya

### 3.2 Vessel specific information

The fleet map offers a variety of useful information. Click on a ship and find:

- 1) The last 12 hours of track (blue line)
- 2) AIS data (general)
- 3) EL e-mail address
- 4) Ships e-mail address
- 5) Bridge duty phone number
- 6) Operator currently operating the vessel
- 7) Planned itinerary for the coming days.

**Black Pearl**

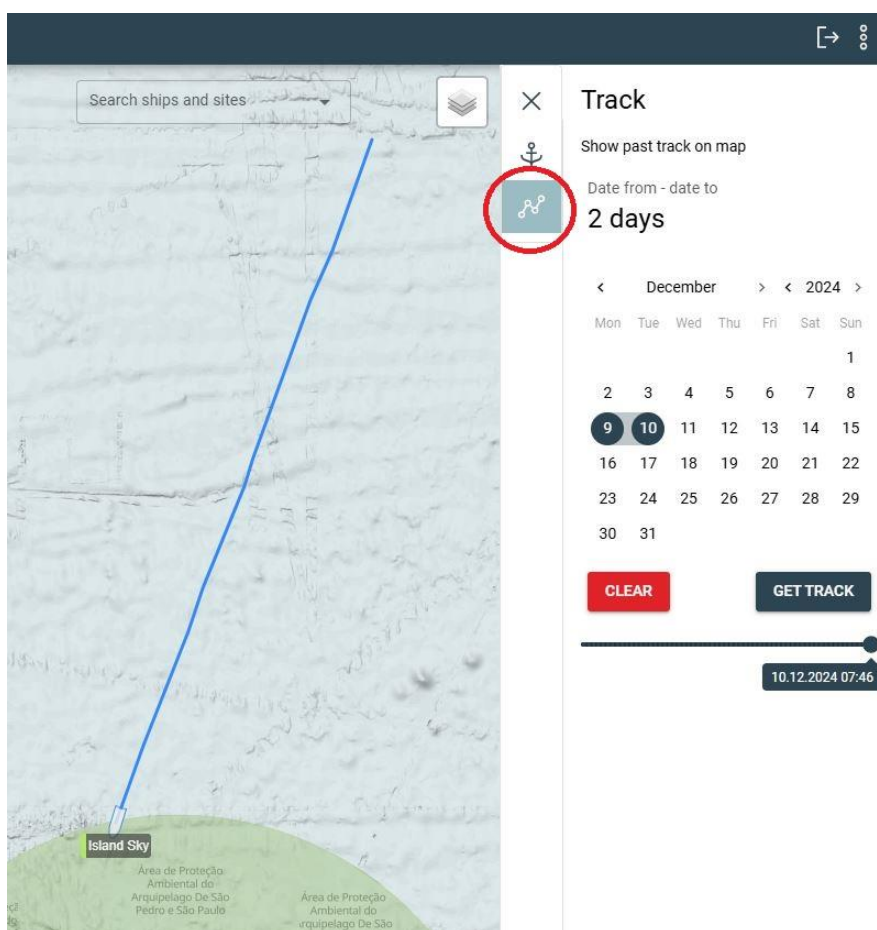

AIS destination	FIHEL<->EEVAN	AIS ETA (UTC)	14.11 12:15
AIS status	Under way	Pos. updated	5 mins ago (AIS)
Position 59°40'20.74" N, 24°44'16.04" E			
IMO / Callsign / MMSI - / ABCD / 230628000			
COG	28 °	Draught	7.0 m
Expedition leader liz@blackpearl.com			
Ship email bridge@blackpearl.com			
Bridge duty telephone +47555555			
Trip ID BPE13NOV2024			
Operator AECO			
Upcoming visits			
1.	Sauðárkrúkur	2024-11-14 07:30-13:00	
2.	Málmei	2024-11-14 13:00-18:30	
3.	Siglufjörður	2024-11-15 07:30-13:00	
4.	Grimsey	2024-11-15 13:00-18:30	

### 3.3 Vessel tracking

The AECO Cruise Database and Live Scheduler features a vessel tracker. The information is based on AIS and Redport data collected.

The vessel tracker has the following limitations:

- Only one vessel at a time is featured
- Only available to show a maximum of 14 months back in time

## 4. Creating Trips

From the top menu select **Edit Trips**.

A window appears which requests basic information about the trip.

- The *Trip number* is the company specific trip number. This is an optional field and only in place to enable members to use their own trip number system.
- The trip can be saved as a draft to allow the member to know which trips have been planned but not yet confirmed. This feature is for internal help only.
- Once a trip is confirmed it can be saved as confirmed to show that it does not need further attention until the opening of the scheduler (Derby Day).
- A trip saved as a draft will still appear in the list of trips and will still be accessible for site bookings, PVR, etc.
- Once the core data has been entered and the trip is saved, an automated *Voyage Code* is generated in the CDB for this specific trip. The *Voyage Code* corresponds to the IAATO format and is used throughout to standardize, easily recognize trip start dates, etc.

The trip is now created with only the core data. This can be done for any trips into the future that have been confirmed. The CDB is open for creating trips with core data only at any time without limitation.

# 5. Booking Sites

## 5.1 Testing and training version

To access the Trip training module, please click the button indicated above. You will access a copy of the actual database and can test creating trips, booking sites, etc.

The training module is completely separate from the actual cruise database and no registrations, changes, additions, or other will appear in the actual live version of the CDB.

## 5.2 Live scheduler

The trips that have been created with core data only features on a list in the **Edit Trips** menu.

To access the details of the trip, press the + sign on the right hand side:

### 5.3 Ship specific PIN code

For cyber security reasons each vessel has a ship specific PIN code attached. The ship specific PIN code is not directly accessible to other than the *Admin* and the *Operator* roles. Find it in the **Ships** menu – first information box where it is visible only to the *Admin* and *Operator* roles. The ships specific PIN code is required when adding trips and booking or editing sites (also in the offline version of the booking system). The *Admin* or *Operator* must share the ships specific PIN with the *expedition leader* role of the vessel for the expedition leader to edit trips during the season. Without the ships specific PIN code you cannot edit trips.

The screenshot shows the AECO database interface. The top navigation bar includes links for DASHBOARD, SAILING PLANS, EDIT TRIPS, PVR, TASKS, FLEET MAP, and DATABASE. The main content area displays a trip booking form for the ship "Black Pearl 2". The form includes fields for Voyage number, Ship, Operator, Expedition leader, Embarkation port, Start date, Disembarkation port, and End date. A modal dialog titled "Enter PIN code to proceed" is open, asking for a 6-digit PIN code. The background shows a map of the Arctic region and a list of regions on the right.

ID	Name	Region
1436	14. Julibukta-breen (northeast si...	SJ - Nordvest-Spitsbergen national park
1322	Aappilattoq	GL - South (Lindenow F. - Kuannersooq F.)
1265	Aasiat	GL - North (Nassuttooq - Petermann G.)
1706	Adambreen - Magdalenafjord	SJ - Nordvest-Spitsbergen national park
1890	AECO HQ, Tromsø	SJ - Other sites in Svalbard + Jan Mayen
1119	Agpat Island - Umiassugssup Bay	GL - North (Nassuttooq - Petermann G.)
1517	Agsjæra	SJ - Other sites in Svalbard + Jan Mayen
949	Akilla Island	GL - Capital Region (Kuannersooq F. - Fiskefj)
857	Akpatok Island	CA - Nunavut
1828	Akranes	IS - Vesturland - Snæfellsnes West Iceland
1518	Akseløya	SJ - Van Meijenfjorden national park
1120	Akugdleq	GL - North (Nassuttooq - Petermann G.)
1121	Akunnaaq	GL - North (Nassuttooq - Petermann G.)

- This allows the operators to selectively choose whom they want to allow editing trips.
- It reduces the risk of accidental deletion of bookings.
- For cyber security reasons and to avoid misuse of the expedition leader account (not associated with a private e-mail address), the ships specific PIN will automatically be changed every year.

The PIN is entered once and will be valid as long as your "session" is valid. A session is valid until:

- If you close the tab,
- If you close the browser,
- If you turn off your computer,
- If you log out,
- If you clear your browser data.

## 5.4 Booking/editing sites

There are two ways to book a site visit:

Use the left hand side map by zooming into the area your trip is featuring and press the dot indicating the site position:

The screenshot shows the AECO database interface. On the left is a map of Greenland with a red arrow pointing to a site labeled 'Kangerlussuaq'. On the right is a trip itinerary table. The table has columns for Date, Slot, and Booked site. The 'Booked site' column shows 'Kangerlussuaq' circled in red. Below this, there are rows for dates 24-Apr and 25-Apr, each with three time slots (04:01-07:30, 07:31-13:00, 13:01-18:30) and a 'BOOK' button. To the right of the itinerary is a list of regions with columns for ID, Name, and Region.

Date	Slot	Booked site	Region
24-Apr	04:01-07:30	BOOK	Kangerlussuaq
	07:31-13:00	BOOK	
	13:01-18:30	BOOK	
25-Apr	04:01-07:30	BOOK	Kangerlussuaq
	07:31-13:00	BOOK	
	13:01-18:30	BOOK	

The site name will appear on top of your trip itinerary and show which time slots are available for this site throughout your trip. This is indicated by the BOOK button. Press the BOOK button for the desired time slot to complete your booking.

Towns and settlements most often have more than one visitor allowed at a time. Nature landings, or settlements specifically wishing only one ship visit at a time, however,

cannot be double booked. Once a site is booked, the BOOK button will change into FULL meaning that the site is occupied and cannot be booked for this time slot.

You can also book sites via the right hand side list of sites. Search and press the site you require, and the central booking overview will appear in the same way as when using the map.

The screenshot shows the AECO database interface. The top navigation bar includes links for DASHBOARD, SAILING PLANS, EDIT TRIPS, PVR, TASKS, FLEET MAP, and DATABASE. The main content area is divided into three sections:

- Map:** On the left, a map of the Arctic region shows the location of Sindre Strømfjord - Angujortik Valley, highlighted with a red arrow.
- Booking Overview:** The central table shows bookings for ship Black Pearl 2. The table has columns for Date, Slot, Booked site, and a button to book. The 'Sindre Strømfjord - Angujortik Valley' site is highlighted with a red circle, and the 'FULL' button next to it is also highlighted with a red circle.
- Site List:** On the right, a list of sites is shown with columns for ID, Name, and Region. The list includes various locations in Greenland, Svalbard, and Iceland.

- There is a five second delay after each site booking in which new site bookings are not possible.
  - o This mitigates possible misuse by bots or similar, to log sailing plans automatically.
  - o The five second delay is ships + company specific meaning if two or more trips for the same ship are worked on by any number of different users simultaneously there is a five second delay between bookings implemented regardless of user entries.
  - o The five second delay is ships + company specific meaning if two different members charter the same ship, they will have individual five second delays when booking sites.

## 5.5 Booking site – rules

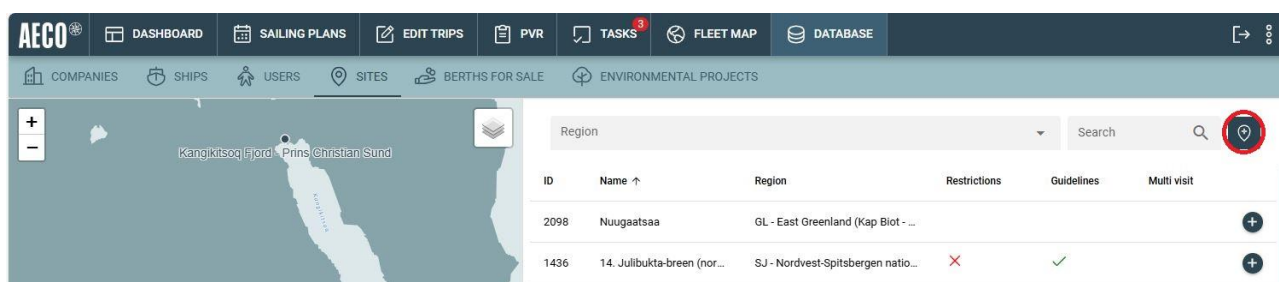

From the date and time, the scheduler opens (Derby Day) and 14 days ahead, you cannot book two prime time slots in a row on the same day. Prime time slots are 07:31 – 13:00 and 13:01 – 18:30.

With limitations to booking sites in some areas of the AECO geographic range, it is deemed necessary to initially allow two different ships to be able to book a site during the prime time slots. However, if a site is available for the two consecutive prime time slots 14 days after Derby Day, this rule is no longer applicable, and it is possible to book these slots freely.

It is possible to book a shoulder time slot + a prime time slot at Derby Day. I.e., 04:01 – 07:30 and 07:31 – 13.00.

## 5.6 Requesting the addition of a new site to the database

To comply with AECO obligations, you must submit a complete PVR. If you visit a site that is not present in the Cruise Database, you must request that it is added.

The screenshot shows the AECO web application interface. The top navigation bar includes 'DASHBOARD', 'SAILING PLANS', 'EDIT TRIPS', 'PVR', 'TASKS', 'FLEET MAP', and 'DATABASE'. The 'DATABASE' menu is expanded, showing 'COMPANIES', 'SHIPS', 'USERS', 'SITES', 'BERTHS FOR SALE', and 'ENVIRONMENTAL PROJECTS'. The 'SITES' menu is selected, and a map of Greenland is displayed on the left. On the right, a table lists sites with columns for ID, Name, Region, Restrictions, Guidelines, and Multi visit. A red dot on the map indicates a new site request.

ID	Name	Region	Restrictions	Guidelines	Multi visit
2098	Nuugaatsaa	GL - East Greenland (Kap Blot - ...)			
1436	14. Julibukta-breen (nor...	SJ - Nordvest-Spitsbergen natio...	✗	✓	

A new site request can be issued by the *Admin*, *Operator*, and *EL* roles. Access the **Sites** menu via the top menu >> **Database**. On the top right you will find a button labeled with a marker. Press the button and the **Request new site** window opens.

Find the site on the map and click with your mouse. The new site is indicated with a red dot. The position of the site is automatically registered. Suggest site name (if available) and complete the drop down menus about general site information. Multiple topics can be indicated for each drop down menu.

This site information will be available for each site in the database to use for basic preparations for others that may not have visited the site before.

Request new site
CLOSE
SEND REQUEST

Suggested site name <small>Optional</small>	Comments <small>Optional</small>	Latitude * 63.23177 <small>Decimal format</small>	Longitude * -41.32919 <small>Decimal format</small>
Landing site *	Suitable activities *	Safety *	Highlighted features *

Once the form is completed to the extent possible, send the request to the *AECO Admin* to get the site confirmed. The *AECO Admin* receives an e-mail with the request and will investigate if any restrictions apply, any guidelines should be attached and find the correct place name for the site in question. Once confirmed the site is available in the cruise database.

## 5.7 Booking/editing sites if offline/low bandwidth

Imbedded in the CDB is a functionality where you can request site lists, request updated sailing plans, book, and release sites via e-mail only. Please refer to the manual for the low bandwidth booking system.

## 6. Post Visit Report

Post visit reports (PVRs) are tightly integrated with the trip itinerary as booked under **Edit Trips**. Site bookings are automatically transferred to the PVR section for the given trip where activity details can then be manually added.

PVRs must be submitted 14 days after the end of each trip.

### 6.1 PVR Core Data

The PVR requires trip specific data as well as site and activity data at the given site. The PVR core data consists of the total number of people and the distribution of nationalities onboard based on passengers, crew, staff, and others.

CLOSE PVR status DRAFT SAVE AS CANCELLED SAVE AS DRAFT SUBMIT

Total persons on trip PAX 32 Crew 4 Staff 8 Other 2 Total 46

Record of expedition numbers by Nationality

Nationality	PAX	Crew	Staff	Other	Total
Finland	32	4	8	2	46
Sum	32	4	8	2	46

Save Nationality Nationality PAX 0 Crew 0 Staff 0 Other 0 Total 0 UPDATE

### 6.2 Double bookings back in time

A PVR may differ from a trip itinerary booked under **Edit Trips** if two or more sites have been visited during a given time slot, i.e., a vessel takes advantage of a free site adjacent to the booked site at the same time slot and have activities at both at the same time.

It is not possible to double book nature landing sites into the future, but it is possible to double book sites in the past when there is no longer a practical impact on the overall sailing plans.

- Double bookings can be made from the day after the activities have occurred.

Click the Add Visit button and book sites that are otherwise missing from the automated transfer of sites from the booked sailing plan of the trip.

- The new double booking back in time will appear both in the original trip itinerary and the PVR section.

## 6.3 Activity information

Add activity information for each site by pressing the + sign on the right hand side of the site list.

The screenshot displays the AECO database interface. At the top, there's a navigation bar with tabs: DASHBOARD, SAILING PLANS, EDIT TRIPS, PVR, TASKS, FLEET MAP, and DATABASE. Below this, a summary section shows 'Total persons on trip' with breakdowns for PAX (32), Crew (4), Staff (8), Other (2), and Total (46). A 'PVR status DRAFT' label is present. To the right are buttons for 'CLOSE', 'SAVE AS CANCELLED', 'SAVE AS DRAFT', and 'SUBMIT'. Below the summary is a table titled 'Record of expedition numbers by Nationality' with columns for Nationality, PAX, Crew, Staff, Other, and Total. The data shows Finland with 32 PAX, 4 Crew, 8 Staff, 2 Other, and a Total of 46. A red circle highlights a '+' icon in the right margin of this table. Below the table is a 'Save Nationality' section with a dropdown menu and input fields for PAX, Crew, Staff, Other, and Total, all currently at 0, with an 'UPDATE' button. At the bottom is a table titled 'Landings, anchorings and activities' with columns for Date, Time, Site, Region, Persons ashore, and Activity. It lists two entries for 2024-06-02. A red circle highlights a '+' icon in the right margin of this table, next to an 'ADD VISIT' button.

Nationality	PAX	Crew	Staff	Other	Total
Finland	32	4	8	2	46
Sum	32	4	8	2	46

Date	Time	Site	Region	Persons ashore	Activity
2024-06-02	07:30-13:00	Kangerlussuaq	GP - Arctic Circle Region (Fiskefjord - Nassuttooq)		
2024-06-02	13:00-18:30	Sandre Strømfjord - Anguajafortik Valley	GP - Arctic Circle Region (Fiskefjord - Nassuttooq)		

The details for each site visit will appear.

The details for each site visit will appear.

- The number of people ashore must be added. Differentiate between passengers, crew, staff, and others.
  - o The same person can participate in different activities at the same site and added as a participant for each activity but count only as one unique person ashore.
  - o For example, the activities Zodiac/Small boat landing + Extensive hike + Clean Up (same person entered thrice) but still only the one person onshore.
  
- Any number of different activities can be added and the number of participants in each activity entered.

2024-07-01 - 07:30-18:30 - Kangerlussuaq

Save activity

Activity	Participants
Activity	0

UPDATE

Remember to **Update** both when entering *Unique persons ashore* and *Activity/Participants*.

This includes if you only do water based activities on a given site: Enter 0 (zero) in all fields (no persons onshore) and press *Update*.

## 6.4 Clean Up reporting

Special to the new activity reporting system is that when the activity **Clean up** is selected and confirmed by pressing *Update*, a pop up window occurs where details of the clean-up are reported. The requested information is the same as it used to be requested to be reported separately by e-mail.

The screenshot shows the AECO PVR (Port Visit Report) form. At the top, there are buttons for 'CLOSE', 'PVRs PENDING', 'SAVE AS CANCELLED', 'SAVE AS DRAFT', 'SUBMIT', 'ACCEPTED', and 'REJECTED'. The form includes sections for 'Ship' (with a dropdown), 'Total persons on trip' (with sub-sections for PAX, Crew, Staff, Other, and Total), 'Nationalities' (with a table for Nationality, PAX, Crew, Staff, Other, and Total), 'Save Nationality' (with a dropdown and an 'UPDATE' button), 'Landings, activities and activities' (with a date and time range), 'Unique persons ashore at site' (with sub-sections for PAX, Crew, and Staff), and 'Activities performed' (with a table for Activity ID, Category, and Participants). An 'Additional fields' modal is open in the center, containing four input fields: 'Approximate weight (kg)', 'Number of bags collected (1 m3 bags)', 'Approximate number of pieces collected', and 'Distance of beach cleaned (meters)'. The modal has 'CANCEL' and 'SAVE' buttons at the bottom.

Please estimate as best possible and press save.

### 6.5 Completing a PVR

A PVR can be edited during the trip and saved as DRAFT. Once the PVR is completed, it must be submitted. This will let the *AECO Admin* know that the PVR is ready for a check and approval or dismissal. Once the AECO Admin has approved the PVR it will feature as approved on the PVR list overview. Once a PVR has been approved it can be exported for internal filing should it be required.

### 6.6 Exporting a PVR

You can export a PVR directly from the PVR list. Use the XLS icon on the right hand side of the trip you wish to export.

The screenshot shows the AECO PVR list. The table has columns for ID, Ship, Operator, Leader, Start, End, Status, and Updated. The first row shows a PVR for the ship 'Black Pearl' with status 'PVRs pending'. On the right side of the table, there is a red circle around an 'XLS' icon, which is used to export the PVR to an Excel file.

ID	Ship	Operator	Leader	Start	End	Status	Updated
BPE01JUL2024	Black Pearl	AECO	TJ	01.07.2024	08.07.2024	PVRs pending	31.05.2024 06:14

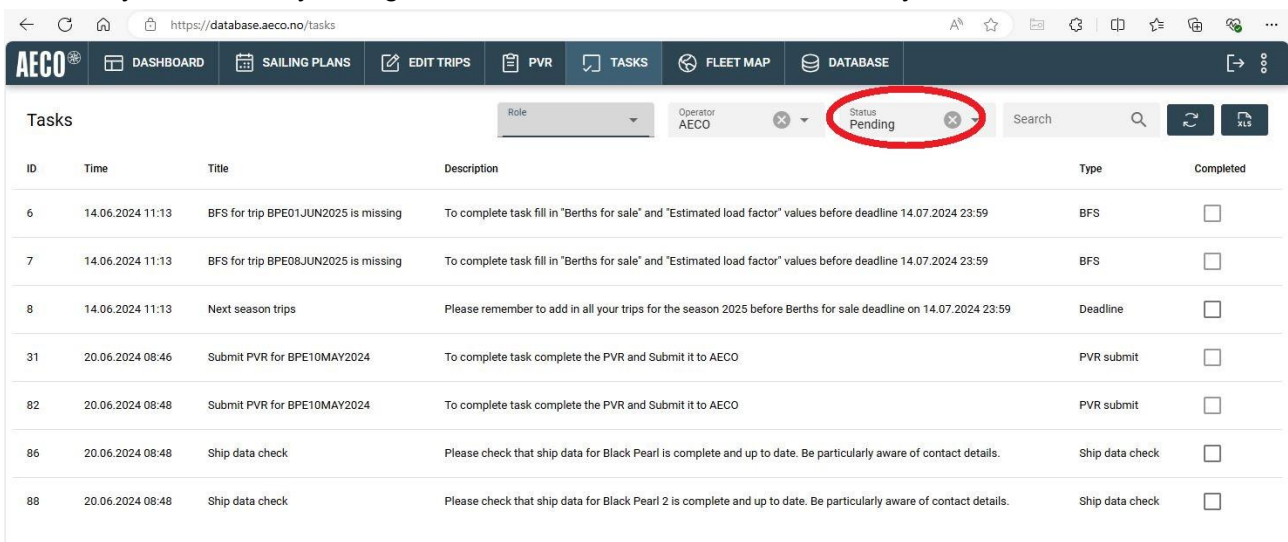

## 7. Tasks

The Cruise Database and Live Scheduler features a tasks list for users to quickly get an overview of missing obligations. Tasks will appear automatically for a variety of topics that are either subject to a deadline or have passed a deadline. An automated e-mail will be sent out weekly requesting to log on and check the tasks list in case tasks need to be completed. If no tasks need to be completed no e-mail will be forwarded.

The tasks are user specific. This means that *Admin* or *Operator* roles get a list of **all** tasks that their company needs to complete. Some may be delegated but others will need dedicated attention. The *Expedition Leader* role will only get tasks related to missing PVRs but not tasks related to the shore based operations department obligations.

The *Bridge/DPA* role will be prompted with the task of checking the ships' information annually.

For most tasks the check box on the right hand side is completed automatically once the task has been completed. Tasks that include the annual check of ship data, which may not have any changes, will have to be checked off manually.

ID	Time	Title	Description	Type	Completed
6	14.06.2024 11:13	BFS for trip BPE01JUN2025 is missing	To complete task fill in "Berths for sale" and "Estimated load factor" values before deadline 14.07.2024 23:59	BFS	<input type="checkbox"/>
7	14.06.2024 11:13	BFS for trip BPE08JUN2025 is missing	To complete task fill in "Berths for sale" and "Estimated load factor" values before deadline 14.07.2024 23:59	BFS	<input type="checkbox"/>
8	14.06.2024 11:13	Next season trips	Please remember to add in all your trips for the season 2025 before Berths for sale deadline on 14.07.2024 23:59	Deadline	<input type="checkbox"/>
31	20.06.2024 08:46	Submit PVR for BPE10MAY2024	To complete task complete the PVR and Submit it to AECO	PVR submit	<input type="checkbox"/>
82	20.06.2024 08:48	Submit PVR for BPE10MAY2024	To complete task complete the PVR and Submit it to AECO	PVR submit	<input type="checkbox"/>
86	20.06.2024 08:48	Ship data check	Please check that ship data for Black Pearl 1 is complete and up to date. Be particularly aware of contact details.	Ship data check	<input type="checkbox"/>
88	20.06.2024 08:48	Ship data check	Please check that ship data for Black Pearl 2 is complete and up to date. Be particularly aware of contact details.	Ship data check	<input type="checkbox"/>

Once completed the task is removed from the "Pending" tasks list. Notice that the "Pending" tasks are set as the default filter. If you wish to see completed tasks including a time stamp and name for who has completed the task, please select "Completed" in the filter option.

## 8. Sites

------	--------	---------------------------------------	---	---	--	------------------

Some details can only be edited by the *AECO Admin* when registering a new site. Other features (Comments, Landing site, Suitable activities, Safety and Highlighted features) can be edited by the *EL* role. This enables basic knowledge on a site to be related to other users that may use a site for the first time.

The O-VRAT app is now integrated with the new Cruise Database and Live Scheduler. This means that all information available in the O-VRAT app is now also available when clicking the + sign for a specific site. This can be AECO Guidelines or Restrictions of any kind.

## 8.2 Svalbard site regulations - 2025

From 1 January 2025 site regulations come into force in Svalbard. 43 limited coastlines will be available for landings. The AECO Cruise Database sites entries are based on single points – not stretches of coastline as are the regulations. Hence sometimes more than one registered landing site is available for landings within a given restricted area. On the Sites list and the Fleet Map site overlay it is now easily recognizable which sites can be landed at (small black circle) and which can be booked for water activities only with no landing allowed (black triangle).

- This feature is not supported in the O-VRAT app.
- Certain areas on the coast of Spitsbergen, marked with black triangles, are allowed to be landed at from 1 January – 25 May on snow covered ground.
- For further details on specific landing requirements please see the site specific information in the Sites tab, Fleet map sites overlay or O-VRAT app (from November 2024).

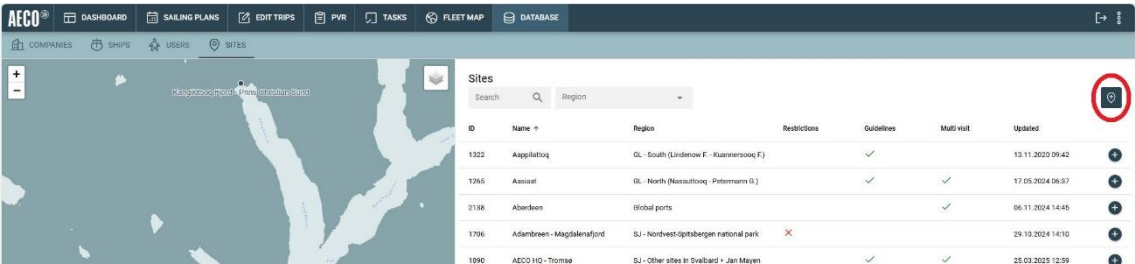

8.3 Site bookings not possible in no go areas

Existing sites previously logged in areas currently designated as NO GO ZONES are not possible to book in advance. For reasons of maritime safety (i.e. seeking shelter from the weather) these sites are possible to log in a PVR back in time (after the date of the visit). The sites that are not possible to book are marked with a red triangle.

8.4 Requesting the addition of a new site to the database

To comply with AECO obligations, you must submit a complete PVR. If you visit a site that is not present in the Cruise Database, you must request that it is added.

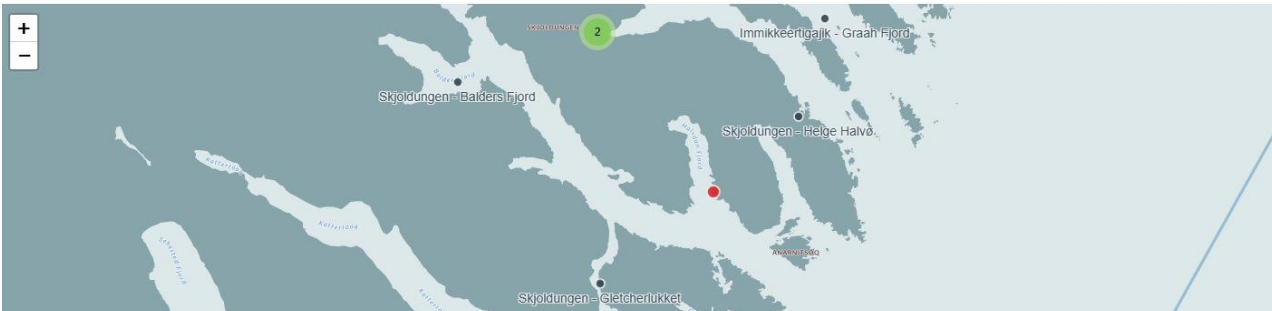

A new site request can be issued by the *EL* role (and *Admin* and *Operator*). Access the **Sites** menu via the top menu >> **Database**. On the top right you will find a button labeled with a marker. Press the button and the **Request new site** window opens.

Find the exact site on the map and click with your mouse. The new site is indicated with a red dot. The position of the site is automatically registered. Suggest site name (if available) and complete the drop down menus about general site information. Multiple topics can be indicated for each drop down menu.

This site information will be available for each site in the database to use for basic preparations for others that may not have visited the site before.

**Request new site** CLOSE SEND REQUEST

Suggested site name <small>Optional</small>	Comments <small>Optional</small>	Latitude * 63.23177 <small>Decimal format</small>	Longitude * -41.32919 <small>Decimal format</small>
Landing site *	Suitable activities *	Safety *	Highlighted features *

Once the form is completed to the extent possible, send the request to the *AECO Admin* to get the site confirmed. The *AECO Admin* receives an e-mail with the request and will investigate if any restrictions apply, any guidelines should be attached and find the correct place name for the site in question. Once confirmed the site is available in the cruise database.

## 9. Companies & Ships

Access information about the company you work for and a list of ships in the fleet of that company can be found in the sub-menus **Companies** and **Ships**. Access via the menu **Database** These are for reference only for the EL user level.

## 10. Users

Access the sub-menu **Users** via the menu **Database**. The information on your log on details are available here. Use this sub-menu to change the username of the profile.

# 11. Trouble Shooting

## 9.1 Encountering issues with a page not loading correctly

Reload the page:

PC: Simultaneously press Shift+Ctrl+R.

MAC: Shift + Reload.

## 9.2 Cannot log on to Cruise Database and Live Scheduler

If you are unable to log on to the Cruise Database and Live Scheduler please contact your company *Admin* or *Operator*. The likely problem is associated with internal system safety features and will need the attention of the company IT department.

Feel free to contact [database@aeco.no](mailto:database@aeco.no) if you have any questions.
